Open Mesh

a datto company

FCC ID: WT8G200
IC ID: 10103A-G200

G200

Cloud-Managed Gigabit Router
with Integrated Firewall

Step 1:

Connect the included 24V power supply to the G200

Step 2:

Connect to your ISP using one of the following options:

● Connect the included Ethernet cable to the WAN Ethernet port

● Use a standard SFP transceiver to connect to the SFP WAN port

● The G200 connects to your ISP using DHCP*. Once connected, the top LED will turn solid teal.

* Visit help.cloudtrax.com for instructions on how to configure a static IP

Step 3:

Login to **CloudTrax.com** or download the CloudTrax mobile app to manage router settings and features

Additional Notes:

● The G200 provides 4 LAN ports. Ports 3 & 4 provide 24V Passive PoE and can power Open Mesh access points

● PoE is disabled by default, it can be enabled in CloudTrax under router settings
